### **IV Red Cross Presentation**

Erica Wolfe, Disaster Program Manager for the American Red Cross stated she has 2.5 years of experience with the DAT (Disaster Action Team). They have 50 regional offices in 17 Pennsylvania counties. They strive to be onsite within two hours of first contact (800-Red-Cross). The call center has been outsourced to OnStar. There are 30 volunteers in the Chester County DAT.

The three areas of DAT's concentration are Preparedness, Response (most frequently home fires), and Recovery (immediate needs – primarily the first 48 hours). The greatest time spent is in the preparation phase - educating people about disaster preparedness. Erica stated 90 percent of their workers are volunteers. They give out smoke detectors and do widespread neighborhood sweeps to educate the public of the importance of having working smoke detectors.

Erica said they frequently work with the schools to solicit volunteers and mentioned West Chester University has been a big supporter and helpful in the past.

Erica discussed the response efforts when called out for an emergency, which frequently is done by the incident commander. The Red Cross will provide funds for temporary housing at local hotels and provide additional financial assistance, as necessary. If faced with a disaster, impacted people can always call 211 and a resource (United Way, American Red Cross, etc.) will help in any way possible depending on the situation and disaster. For larger scale disasters the Red Cross has a pre-inspected national shelter system. If needed, their services may also include spiritual and mental health counseling.
