

Make the call or click before you dig

It takes approximately four and a half minutes to create a ticket when calling **811**—compared to four and a half days (or more) of lost time if an underground utility is struck because you didn't call **811**.

Calling **811** or using **clickbeforeyoudig.com** doesn't just protect the integrity of our pipelines, it can protect your business and save your life.

One of the leading causes of pipeline failure is damage resulting from nearby excavation. In 2022, 233,810 incidents involving damage occurred on underground infrastructure across the U.S.¹

By making a call to **811** or visiting **clickbeforeyoudig.com** at least two to three days prior to any soil-disturbing project (depending on state law), you become part of the solution to protecting underground infrastructure, including the pipelines that bring a vital source of energy to you and your neighbors on a daily basis. Making the call to **811** or using **clickbeforeyoudig.com** is **free**, and doing so contributes to the safety of you, your crew and anyone else who may be near. It may save your life.

I'm not digging that deep. Why bother calling 811 or using clickbeforeyoudig.com?

The depth of pipelines and other utilities can change over time due to erosion, shifting soils or other factors.

This land has been in my family for generations, I know where everything is located.

Making assumptions about the location of pipelines and other utilities is risky and could result in serious safety issues.

Make the call or click.

There are no markers where I will be digging, so I don't need to call 811 or use clickbeforeyoudig.com.

Markers, including those for pipelines, are meant to provide an approximate location and may not always be present.

I have some drainage canals on my property. Do I need to call 811 when I'm doing maintenance on them?

While it may seem like a routine task, maintenance on drainage ditches and canals can be hazardous. Pipelines and other utilities can cross these canals, often concealed by water and/or soil.
